

Floating Turbine Testing

Continued from page 1

Minas Energy was awarded a berth at the FORCE site in 2009 by the Nova Scotia Department of Energy. Under this new arrangement, Minas Energy will continue its prominent role in establishing a new marine renewable energy industry in Nova Scotia.

IME is a Canadian company which is owned by Tribute

Resources, of London Ontario, and the Calgary-based Himmelsbach Group. In 2013 Tribute acquired Western Tidal Holdings Ltd., a British Columbia-based renewable energy company focusing on developing tidal power energy in B.C.

Tocardo is a Dutch-based company and a global leader in tidal energy solutions. Tocardo is focused on state-

This artist's conception shows what is underwater. Each component will include four 250 Kw T2 bi-directional open rotor turbine generators. Four of these are expected to be installed in the Minas Tidal berth in late 2017. (Submitted)

An artist conception of the Tocardo floating turbine as it's put into the water to be towed to the Minas Tidal berth within the FORCE testing site. (Submitted)

Chasing Champions: The Sam Langford Story

August 3-28

Sam Langford is considered one of the greatest fighters ever, yet he never claimed a world boxing championship. The reason is simple: Langford was the most avoided fighter in the history of boxing. As sport and race were colliding head-on, Langford relentlessly travelled the world, chasing dreams and titles.

New Discoveries of 200 Million-year-old Lizard, Dinosaur Bones

See photo on page 1

Minas Energy is a member of Scotia Investments Limited, which traces its roots to R. A. Jodrey, one of Nova Scotia's most successful entrepreneurs, whose first company was incorporated in 1920. After working in the Nova Scotian power generation business for nearly 80 years, the Minas Energy team was a key player in the founding of FORCE and this tidal energy project in Nova Scotia.

years old and his team is heading back to Wasson Bluff July 28-31 for additional field work. The new specimens are on display at the museum. "The new lizard-like reptile skulls and teeth found this year are very important for providing a window into an ancient earth that was recovering from a global mass extinction," said Mr. Fedak. "It is exciting to think what else

Tim Fedak, director and curator of the museum, said the bones are 200 million

we may find as work continues this summer."

Two special public tours of the research site will take place on Thursday, July 28, and Saturday, July 30. The tours, beginning at 1 p.m., leave from the museum, 162 Two Islands Rd., Parrsboro. For more information, visit <http://fundygeological.novascotia.ca/events>

Deadline for the September issue of South Cumberland NEWS is Aug 23

August Court Appearance

Continued from page 1
Environment, the Attorney General, Fundy Ocean Research Centre for Energy Ltd. (FORCE) and Cape Sharp Tidal Venture Ltd.

Colin Sproul, BoFIFA spokesman, indicated he continues to be optimistic BoFIFA can enter into a meaningful dialogue with Cape Sharp about the economic and environmental concerns that BoFIFA have been raised by the association. Other groups who have voiced concern include Ecology Action Centre, Striped Bass

Association, several First Nations groups and others.

The group is asking the court to set aside or throw out the DOE Minister's decision approving the monitoring program on the grounds a number of environmental safeguards were disregarded or overlooked, including the Species at Risk Act.

The application states the minister, Margaret Miller, erred in law acting unreasonably in her June 20th decision by proceeding contrary to the requirements of a 2009 agreement. The court application

also claims by authorizing the monitoring program, Miller minister failed to adequately consider evidence provided by Fisheries and Oceans Canada and others including the lack of baseline data, species at risk and their habitats.

Sarah Dawson, Community Relations Manager, Cape Sharp Tidal Venture said it is not Cape Sharp's practice to comment on matters before the court. On Friday June 20th, Melissa Oldrieve, FORCE's director of operations, told the Chronicle Herald they weren't aware of the application.

Visit the Museum in August!

Experience one of our popular Beach Tours.

See website for more details.

A PART OF THE NOVA SCOTIA MUSEUM

First Beach - Fundy Tide Experience:

Cost: Museum Admission + \$10/per.

Wed. August 3, 11:00 am

Sat. August 6, 1:00 pm

Guided Tour of Jurassic Dinosaur Site:

Cost: Museum Admission + \$20/per.

Wed. August 10, 1:00 pm

Sat. August 13, 1:00 pm
