### Strengthening Asset Management in Nova Scotia

The Government of Canada, along with the Federation of Canadian Municipalities (FCM), announced an investment of \$348,460 in seven Nova Scotia communities. This funding will help them make data-driven decisions about key infrastructure and ensure long-term infrastructure performance.

The Municipality of the District of East Hants is receiving \$50,000 to assess current capacity of a water treatment

plant and a wastewater treatment plant and compare that capacity to future treatment requirements. It will also collect asset management data for computer modeling of exist-

ing water, wastewater, and stormwater systems to determine asset needs.

The Town of Stellarton is receiving \$49,950 to complete an inventory of its major assets including linear assets, buildings and structures and fleet, and develop a comprehensive asset management program document that will assist in operationalizing asset management in the municipality.
