Portapique Bridge to be Repaired

Continued from page 1
bridge and support the weight in the same fashion as the current wooden piles that are currently directly underneath and are failing.

In other monthly writings, Taggart has stated, "The Portapique bridge has had the drilling completed to determine the extent of the piling needed. The design work is underway".

As an aside observation related to the bridge closer, except for heavy increase in traffic, residents on East / West Montrose Road can say, their road has never been in such good condition. Extensive grading, applications of dust control and lots of traffic their road has never been in such good condition. As one motorist remarked West Montrose is a better drive than many of the pothole patched paved roads, I drive on every week.

HAPPY CANADA DAY!
