How to Improve Indoor air Quality in Winter

Plants can improve indoor air quality by helping to remove harmful irritants from the air.

Homes tend to be stuffier in autumn and winter. As temperatures outside dip, windows are closed and air quality inside homes can suffer.

Poor indoor air quality can not only be uncomfortable, causing residents to experience headaches, dry eyes and nasal congestion, but also can be unhealthy. According to the American Lung Association, poor indoor air quality can cause or contribute to the development of infections, lung cancer and chronic lung diseases, such as asthma.

Though it's not feasible or healthy to open windows when temperatures outside dip to near or below freezing, there are steps everyone can take to improve the indoor air quality in their homes.

- Add to your décor with plants. Plants provide both aesthetic and practical appeal to a home's interior. Houseplants can clean and purify the air in a home, helping to remove formaldehyde,

benzene and other toxins that can make indoor air unhealthy to breathe. Benzene is an irritant that can cause dizziness, headache, nausea, and blurred vision, among other side effects. Formaldehyde, which is often found in homes thanks to its widespread use in a range of products, can cause watery eyes, nausea and wheezing.

- Watch what you are lighting up. Many homeowners know that smoking indoors drastically reduces indoor air quality, putting even nonsmokers at heightened risk of developing various respiratory ailments. Homeowners concerned about the indoor air quality in their homes should ban smoking inside, no matter how low temperatures dip outside. In addition, homeowners with wood-burning stoves and fireplaces should be especially diligent maintaining

these features, as they can release harmful soot and smoke if they are not taken care of. Some people may also be allergic to incense and scented candles, so keep a watchful eye on residents and guests whenever you light candles or sticks of incense. If any symptoms of allergies appear, avoid lighting any more candles or incense, waiting until you can open the windows if you want to light any again.

- Purchase an air purifier. Air purifiers are beneficial year-round, helping to remove allergens and particles from a home. High-efficiency particulate air filters, known as HEPA filters, are extremely effective at removing airborne particulates from the air inside your home.
- Pay attention to pets. Like their owners, pets tend to spend more time indoors during the winter. That means more fur and pet dan-

der, the skin flakes in an animal's fur or hair that can trigger allergic reactions, is likely in your home during the winter than in the summer. To combat this, bathe your pets regularly in the winter, making sure to wash the animal's bedding in hot water on a weekly basis as well.

- Open the windows when possible. Winter does not typically provide many opportunities to open the windows, but you might get a few chances to let some fresh air in through the windows during winter. Make the most of these opportunities, and when possible crack the windows when you're cleaning so dust and other particles that kick up have a path outside of your home.

Clean interior air should be a year-round priority, but homeowners may have to go the extra mile to keep their homes' interior air clean when winter arrives.

Taggart Attends FCM Board of Directors Meeting

Colchester Councillor, Tom Taggart joined municipal leaders from across the country in the Regional Municipality of Wood Buffalo in Alberta to discuss how imminent decisions on the federal government's national infrastructure plan and National Housing Strategy can transform cities and communities across Canada.

The federal government's new \$81 billion Phase 2 infrastructure plan recognizes that

investing in local infrastructure unlocks productive potential for workers, businesses and community members. From expanding public transit, roads networks and water systems, to building more climate-resilient communities, to supporting the priorities of rural, remote and northern communities - designed and delivered right, this commitment can build a better Canada and a better Colch-

ester County.

"FCM has a critical year ahead to consolidate gains made for municipalities in Budget 2017 as the upcoming Integrated Bilateral Agreement negotiations for Phase 2 spending gets underway between the federal government, provinces and territories," said Taggart. "Key to moving transformative projects forward, we'll need to see full and fair cost-sharing by all

orders of government," says Taggart.

Taggart is a member of the Standing Committee on Community Safety and Crime Prevention as well. He reports that this year the committee's focus will be on cannabis legalization and regulation; Disaster Mitigation and Adaptation Fund; and policy development on disaster mitigation and response to flood events.

Which is Better – Canned or Fresh?

By Chris Urquhart

Wondering about using pumpkin and which is better – canned or fresh? A friend told me, "I've heard that canned pumpkin is healthier than fresh pumpkin. Is that true?"

So I checked. The answer: Not necessarily.

Fresh foods generally have a higher nutrient content than do cooked or canned foods. But in this case, both fresh pumpkin and canned pumpkin are packed with nutrients, such as potassium, vitamin A and iron.

If you want to use fresh pumpkin, look for pumpkins without blemishes that are firm and heavy for their size.

Whole pumpkins can be stored in a cool dark place for up to two months.

If you use fresh pumpkin for bread, soup, pie or other recipes, don't throw away the seeds. You can bake them for a wholesome, crispy snack.

If you're looking for convenience, canned pumpkin without salt is a healthy alternative. Just check the Nutrition Facts label on the can so that you know what you're getting.

Canned pumpkin products may be labeled as "pumpkin," "100 percent pumpkin" or "pumpkin pie mix."

Canned pumpkin pie mix — which some recipes call for — can be much higher in calories than regular canned pumpkin.

Thank You!

I wish to thank all those who showed confidence in me on October 21st and elected me to be Councillor for District 9.

I will work hard on your behalf.

For information and assistance, please contact me at anytime at 902-899-0271.
