

Workers check the levels for the curved seating in the amphitheatre area of the Fundy Discovery Site, which was officially opened on September 21. Supplied by DuraCast, Dartmouth the pre-cast boxes and filled then seating is installed. (Contributed)

The seating has been finished and sod installed between the rows of seats in the amphitheatre. (Contributed)

The rebar and border forms have been put in place awaiting for a concrete pour. A portion of the walkway has been installed in the upper corner. (Contributed)

Nearly half of the amphitheatre floor has been poured and finished. In future many entertainment acts will be entertaining visitors in the curved seating. (Contributed)

The washrooms in Fundy Discovery Site are adorned with stainless steel sinks, which were fabricated and installed by Specialty Steel, Debert. Supply and installation of wall tiles was performed by Cobequid Flooring, Maitland. (Contributed)

Specialty Steel, Debert was contracted to design and fabricate stainless steel bollards with LED strip lighting, which will be installed near the walkways in the amphitheatre. (Contributed)

There is lots of room for many activities in the sandbox. (Rees Photo)
