

## PHOTO FEATURE

Spring is Sprung - Parrsboro was a beehive of activity on Mother's day weekend, gardening, restaurant openings and folks just out for a walk. The real proof is when baseball season starts in earnest and that is exactly what happened. Both ball parks were active with a total of 14 games ongoing. Pictured is the game between the Rainmakers and Pelley. Great fun for all and a wonderful welcome to spring.

### ✓ HEALTH CARE

\$12 million is being invested in a Physician Tuition Relief Program to encourage physicians to practice in underserved communities. Physicians choose which communities they wish to practice and live in and I will work to make Cumberland South a location of choice for attracting and retaining doctors to Cumberland South.

### ✓ ROADS

Working directly with residents and the Municipality to create a local prioritization list for road, bridge and infrastructure improvements I will work with government to advocate for these projects so we will benefit from programs like the Gravel Road Capital Program dedicated funding for gravel road improvements in rural areas.

### ✓ RENEWABLE ENERGY

Cumberland South has a unique abundance of renewable energy like geothermal, wind, solar, and tidal power. Development of these resources will create an enormous impact on Cumberland South's economic future and create meaningful employment opportunities for our area.

### ✓ RURAL INTERNET

I am a rural internet user and I understand our concerns. Improving high-speed internet service in rural areas will take time and ongoing investments like the funding received to build a tower in Port Greville for high-speed internet which enhances quality of life, access to essential services, and helps businesses to innovate.

### ✓ TOURISM

Nova Scotia has seen 3 straight years of visitor growth - the first time in over a decade. In 2016, tourism revenue was \$2.6 billion - the best year in history. The sites and hospitality here in Cumberland South needs to tap into that revenue by working with Tourism Nova Scotia to promote us as a must-see area which will help job creation and economic development.

### ✓ LOCAL DOES MATTER

At the doors, in the streets, on the phone I am listening to the people of Cumberland South. People who are voting Liberal and those who are not because an elected representative needs to represent everyone. Their issues are my issues. In this election, I am not fighting against the other candidates, I am fighting for you - the people of Cumberland South.

# Parrsboro International Plein Air Festival

June 16, 17, 18, 2017
